Kohut believed that optimal empathic failures—those failures of empathy in the analyst that can be successfully managed by the patient—contribute to the development and consolidation of self-capacity, which entails the ability to tolerate the reintegration of previously rejected or split-off parts of the self. Transference is the one thing the presence of which has to be detected almost without assistance and with only the slightest clues to go . Family,CoupleandSystemicTherapy.The

first is what Austin would call the constative dimension.
