Essential to have a methodical structure, that randomly ordered didactic lectures do not always provide. Many students will not be good standardized test takers, but will become phenomenal clinicians. Throughout the year, patient cases presented will relate to the organ system studied in the Physiology and Pathophysiology, Clinical Medicine, and Pharmacology and Clinical Therapeutics courses. The classes are a combination of traditional lectures, web-based learning. Teaches proper data collection through history and physical examination, formulation of accurate problem lists, accurate investigation, and treatment plans. The goal is to evaluate strength, deficits, and help programs identify areas of study that need to be improved.
