By analyzing various digital systems he has sought to better understand the processes of innovation, reception and sharing of digital objects and works. She has published and spoken about fashion, technology, and embodiment, in the U. He works at the intersection of cultural, political, and economic sociology, with a focus on money, finance, globalization, and the sociology of expertise and ideas.

Hence, there is both a legal basis and organizational affinity with the cooperative. This gives us an interesting perspective on the changing nature of trade partnerships. He has also served as the president of the American Political Science Association. On the one hand, globally operating platforms will not be pressured neither by national governments nor by users to re-design their business models in an environmentally friendly manner.

Olivier Zerbib Close. Platform cooperativism and the problem of the outside research is primarily concerned with the institutional dynamics of capitalist development, involving the matter of entrepreneurship, innovation and economic policy, paralleled by an interest in the history of economic and social theory. The second research area investigates the emerging forms of coalition in relation to the current crisis of the traditional models of collective representation.
